PROFILE

A driven back-end software engineer with experience in developing and maintaining microservices in a scrum team to continuously deliver a scalable access platform.

EMPLOYMENT HISTORY

Software Engineer, NetReply UK

London

Jun 2020 — Present

My focus generally centres around the concepts of 5G, SDN and NFV while contributing to the development of Access 4.0 project. As a Golang engineer, I develop and maintain several microservices as part of a scrum team, which includes the testing and deployment of new features in a Kubernetes cluster.

EDUCATION

Information Security, Royal Holloway University of London

London

Sep 2018 — Jul 2020

Mathematics and Computer Science, Royal Holloway University of London

London

Sep 2015 — Jul 2018

HOBBY PROJECTS

en-CRYPT Password Manager

A simple CLI based password manager
