

Patricia Hudakova

Aspiring Software Engineer

Profile

I'm Patricia and I'm a soon to be Information Security graduate currently seeking opportunities in software development. I love learning new skills and working on projects; most recently, I've learned Golang and created an event logger telegram bot with it.

Education

Royal Holloway, University of London
Mathematics and Computer Science
Ended with a **bachelor's degree**

2015 - 2018

Royal Holloway, University of London
Information security
Soon to be ended with a **master's degree**

2018 - 2020

Work experience

Fire Tech Camp

2017 - now

Tutor

Since joining in the summer of 2017, I have since delivered courses to kids in person and remotely, ranging from Video Game Design and AR/VR to assisting the lead teacher to run the whole camp.

Royal Holloway, University of London

2018 - 2019

Teaching assistant

Assisting with OOP and Software Design labs throughout the year involving explaining concepts, helping with set-up and marking.

My Own Research

phudakova.com, Presentation website

My personal website created with HTML and SASS using React

Telegram Bot, Online system

An Event Logger Bot used to help keep track of scheduled events, created using GoLang

GAiA, Calculator

A graph algorithm calculator with four different algorithm options created using JAVA and CSS.
